

CS 370/380

Compact Countertop Check Scanners

Designed for compact environments such as bank front offices or small branches, the CS 370 and CS 380 countertop check scanners provide a full set of features at a reasonable price. Both scanners feature a traditional edge-on U-shaped transport to capture both sides of the check in bitonal, gray or color with E13B, CMC-7 and CMC-0 magnetic ink MICR readers. The CS 370 is a single feed device which is ideal for individual items or occasional scans, while the CS 380 features a multi-check feeder for small batches.

The scanners come complete with VisionShape's TWAIN or ISIS drivers, allowing most standard image capture solutions to scan checks while reading the MICR line. The high quality image can be output as standard Tiff group/4 or JPEG, per Check 21 specifications.

For those requiring a complete capture solution, VisionShape's AutoScan Capture is easy to set-up and run batch scanning applications. You can also easily link these scanners over the Internet via your browser by using VisionShape's Tiffsurfer software to manage the CS scanners.

The CS 370 and CS 380 scanners are ideal for Check 21 or ARC environments where a compact footprint coupled with reliable check scanning are important.

FEATURES/BENEFITS:

- ◆ High speed two-sided check and small document scanning
- ◆ Reliable proven edge feed transport from BUIC, one of the leading desktop scanner vendors
- ◆ Integrated MICR line reading
- ◆ Optional back side ink jet printer / fixed stamp endorser
- ◆ Available TWAIN or ISIS drivers
- ◆ Works with VisionShape VisionX tools or AutoScan Capture software
