

CS 500/550

Back Office Check Scanners Designed For Check 21 Applications

VisionShape's CS 500 and CS 550 check scanners are designed as workhorse back office check scanners for branch check processing or remittance environments. They are ideal for use in the new Check 21 and ARC environments to truncate checks at the back counter.

These check scanners offer compact size coupled with high performance and endurance. These scanners have been proven over many years of demanding back counter work—in a branch, for exception processing, check cashing or

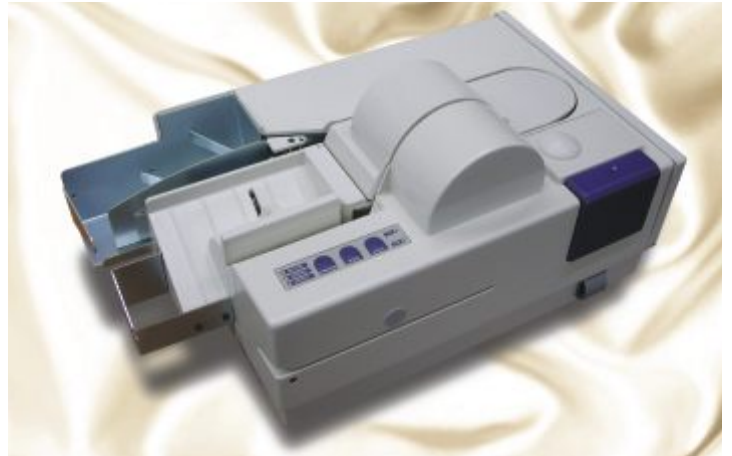

distributed remittance capture. Whatever check scanning needs you may have, the CS 500 will deliver solid quality images while concurrently reading the MICR line magnetically.

Reading MICR magnetically is an important protection against fraud. However, the high quality images created by the CS 500 or CS 550 can easily be recognized using CAR/LAR (Character Amount Recognition/Legal Amount Recognition), reducing the need for key entry and allowing for automatic balancing. Dual pockets on the CS 550 allow for out-sorting checks by exception. Alternatively, if you prefer, you can cascade them to allow for uninterrupted batch operations.

The CS 500 comes complete with standard TWAIN drivers (ISIS is available) enabling it to be incorporated quickly with most document capture solutions. If needed, VisionShape's AutoScan Capture software can be used to easily capture checks and other small documents.

FEATURES/BENEFITS:

- ◆ 250 Item Check Autofeeder
- ◆ Dual-sided Scanning at a Rate of up to 90 Checks/Minute
- ◆ High Quality Images for Accurate CAR/LAR and Check 21 Acceptability
- ◆ In-line MICR Reading
- ◆ Reliable Proven Edge Feed Transport From BUIC, One of the Leading Desktop Scanner Vendors
- ◆ Two Pocket Output is Standard on the CS 550
